### Springboard

Jul 2023 - May 2024

### Certification

UI/UX Design Career Track Certification

### Rochester Institute of Technology

Aug 2017 - May 2022

### Bachelor's of Science

Web and Mobile Computing

## Work Experience

### Associate Application Developer

Jul 2022 - Present

ADP

- Engineered a robust API using C# to enhance system functionality.
- Partnered with the design team to execute updates for ADP's Run product using React, Node, Express, and Typescript, tailored to enhance functionality and user experience for small businesses
- Conducted rigorous unit testing with Mocha, Chai, and Jest to ensure software reliability.

### Front End Developer, Jewelry Site Design

Oct 2021 - May 2022

RDI Diamonds

- Produced wireframes and designs with Figma, facilitating seamless project visualization and collaboration.
- Implemented a design system in conjunction with Shopify's Liquid, HTML, CSS, and JS to craft high-quality web pages for a jewelry site, ensuring consistency and efficiency in development

### Front End Engineer Intern, Portal Redesign

May 2021 - Aug 2021

Beacon Biosignals

- Led the effective redesign of the portal site using Figma, resulting in a refreshed and visually engaging interface.
- Facilitated the development of components for the design system using React, Typescript, and Storybook, ensuring consistency and scalability across projects.
- Implemented thorough End-to-End tests and component tests for the design system using Cypress, enhancing the reliability and stability of the system.
- Established a dedicated Github Repo for managing email communication with Maizzle, streamlining collaboration and organization in email campaigns.

## Projects

### Gatherly

Jul 2023 - Feb 2024

Developed a community app using research-driven methods to tackle the 58% of young adults experiencing high psychological stress, leading to improved mental well-being and user engagement

### Gallery Pal

Jan 2024

Crafted an app to elevate museum experiences using sketches, storyboarding, user interviews, and prototyping to ensure enhanced user engagement.

### NaturalU

Nov 2020 - Present

Developed an app to empower 47% of black women feeling embarrassed by their hair, using personas, user flows, a style guide, and high-fidelity screens.
